ProposalOS

EXECUTIVE SUMMARY

Sterling Consulting faces a critical juncture. Erosion of competitive advantage is impacting deal closures, forcing price concessions, and undermining your firm's strategic narrative. This proposal addresses these challenges directly by leveraging a proven methodology for strategic repositioning.

Our approach is grounded in rigorous market analysis and focuses on building defensible competitive positions. The resulting improvement in win rates and average deal size will quickly justify the investment.

UNDERSTANDING YOUR SITUATION

The current state analysis reveals several critical gaps in market positioning and strategic clarity. Without intervention, these gaps will widen as competitors continue to capture share.

Key Observations

The market is shifting faster than internal capabilities can adapt. Newer entrants are winning deals not on capability but on narrative clarity.

PROPOSED SOLUTION

Our approach is structured across three phases, each building on the previous to create a complete strategic repositioning.

Objectives

- Reduce competitive erosion by establishing a clear strategic narrative
- Improve win rates through defensible positioning and value articulation
- Build internal capability for sustained market leadership beyond the engagement

Deliverables

- Strategic audit report with competitive landscape analysis
- Competitive positioning map with differentiation opportunities
- Growth roadmap with prioritized initiatives and resource requirements
- Executive presentation for board and stakeholder alignment

SCOPE OF WORK

- Stakeholder interviews with leadership team and key practitioners

- Market research and competitive analysis
- Strategic narrative development with messaging architecture
- Final report, presentation, and knowledge transfer session

TIMELINE

- Phase 1 Discovery: 4 weeks
- Phase 2 Positioning: 4 weeks
- Phase 3 Roadmap: 4 weeks

INVESTMENT & VALUE JUSTIFICATION

The investment for this engagement falls within the range of N5,000,000 to N10,000,000. If Sterling Consulting loses even a small number of deals due to competitive pressure, the revenue loss will quickly exceed this investment. The improved win rate and larger average deal size will provide a substantial return.

NEXT STEPS

Schedule a diagnostic workshop with your leadership team to validate initial hypotheses and align on engagement priorities before formal project commencement.

FOLLOW-UP MESSAGE

Subject: Following Up: Sterling Consulting Strategic Advisory Proposal

Dear [Client Name],

The Competitive Positioning Map deliverable will allow Sterling Consulting to visualize your position in the market and identify clear opportunities for differentiation. I would welcome the opportunity to discuss the Strategic Audit phase and how it addresses the specific competitive challenges we identified.

Would you be available for a brief call next week?

Best regards,

[Your Name]
