ProposalOS

EXECUTIVE SUMMARY

Sterling Consulting faces a critical juncture. Erosion of competitive advantage is impacting deal closures, forcing price concessions, and undermining your firm's strategic narrative.

Our approach is grounded in rigorous market analysis and focuses on building defensible competitive positions. The resulting improvement in win rates and average deal size will quickly justify the investment.

UNDERSTANDING YOUR SITUATION

Sterling Consulting is experiencing the costly effects of competitive erosion. Losing deals to newer entrants without a clear understanding of why is a significant symptom.

Maintaining the status quo carries significant risks. Continued loss of deals will further compress margins and erode market share.

Key Observations

The market is shifting faster than internal capabilities can adapt.

PROPOSED SOLUTION

Our approach is structured across three phases.

Objectives

- ◆ Develop a clear and compelling strategic narrative
- ◆ Define and strengthen competitive positioning
- ◆ Create a growth roadmap for capturing market share

Deliverables

- ◆ Strategic Audit Report with competitive landscape analysis
- ◆ Competitive Positioning Map highlighting differentiation opportunities
- ◆ Growth Roadmap with prioritized initiatives and resource requirements

SCOPE OF WORK

- ◆ Stakeholder interviews with leadership team
 - ◆ Market research and competitive analysis
 - ◆ Strategic narrative development
-

- ◆ Final report and presentation

TIMELINE

- ◆ Phase 1 Discovery: 4 weeks
- ◆ Phase 2 Positioning: 4 weeks
- ◆ Phase 3 Roadmap: 4 weeks

INVESTMENT & VALUE JUSTIFICATION

The investment falls within the range of N5,000,000 to N10,000,000. If Sterling Consulting loses even a small number of deals, the revenue loss will quickly exceed this investment multiple times over.

NEXT STEPS

Schedule a diagnostic workshop with your leadership team to validate initial hypotheses and align on engagement priorities.
